ventus evo SUV

ventus S1 evo Z

Ventus evo History

Driven by superior technology, Ventus evo OE tyres are proudly equipped by elite brands like Audi and BMW.

2012

ventus S1 evo²

- Audi Q3, Q5, Q7
- BMW X3/X4
- Mercedes-Benz GLC
- Porsche Macan
- Volkswagen Tiguan

* OE Supplying since 2013

2019

ventus S1 evo³

- Audi Q8
- BMW X5/X6
- Porsche Cayenne

* OE Supplying since 2019

2025

Built to Last*

Product concept

Sharper Wet Control

Precision engineering provides exceptional wet surface control and reliable traction for safer driving

Superb Braking & Cornering

Superior braking maximizes cornering and grip for confidence in any condition

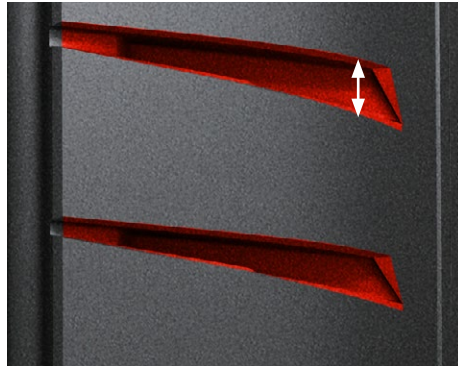

Outstanding Outlasting Performance

Optimized tread design offers peak performance that's made to last

Sharper Wet Control

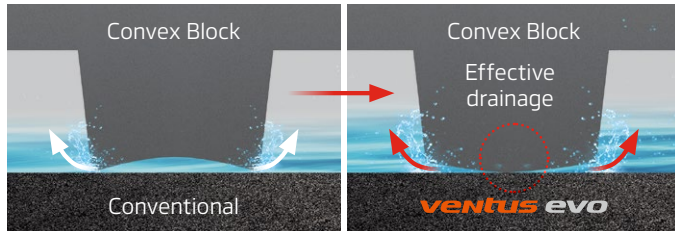

Widening Lateral Grooves

Wet braking performance is improved by optimising lateral shoulder grooves which secure voids when braking or under heavy loads, expanding the contact patch. Additionally, tie-bars applied to the shoulder blocks create a closed structure that reduces noise in regular driving conditions.

Superior Transverse Drainage

The high-performance drainage design controls block deformation to improve contact with the road. Safer wet road driving is achieved by minimising tyre contact gaps caused by concave deformation for 7% improved wet braking and 4% improved wet handling over the previous model.

Wet Braking Improved 7%

compared to its predecessor

ventus evo

Conventional

Wet Handling Improved 4%

compared to its predecessor

ventus evo

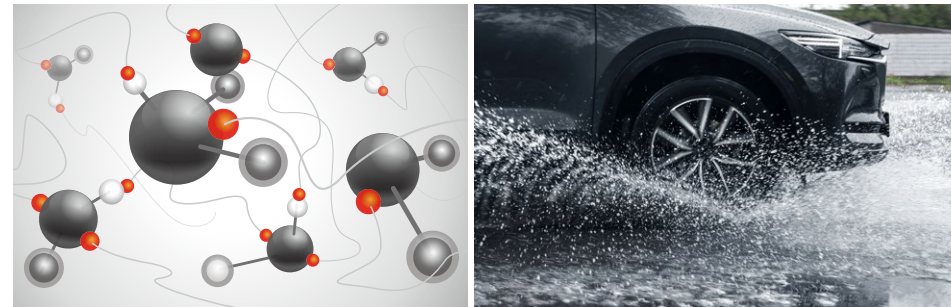

Conventional

Technology

Sharper Wet Control

Enhanced Grip Performance with New Tread Compound

Ventus evo offers excellent grip, even on wet roads, using a new compound with specialised performance resins.

This advanced rubber material optimises hysteresis, the transforming of energy from road contact friction, to enhance grip across various temperature conditions.

EU Label Wet Grip A

Ventus evo and Ventus evo SUV's advanced technology achieved a Wet Grip A rating for all sizes.

Technology

Superb Braking

Chamfer Technology Improves Braking Traction and Uniformly Distributes Contact Pressure

Chamfered design smooths tyre edges for evenly distributed contact pressure and increased friction. Dry braking performance is greatly improved, 6% over our previous model.

Dry Braking Improved 6%

compared to its predecessor

ventus evo

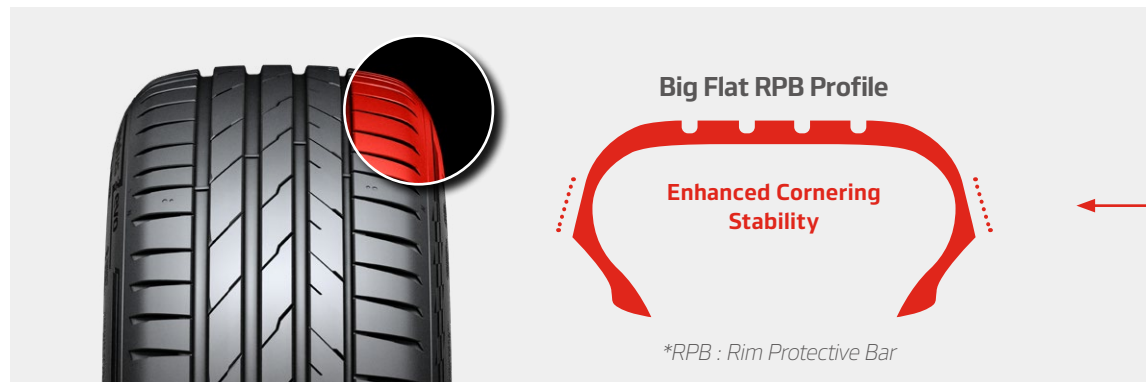

Conventional

Superb Cornering

Enhanced Cornering Stability

The flat side profile improves cornering stiffness for superior grip and stability, even at high speeds.

Optimised Stiffness Pattern

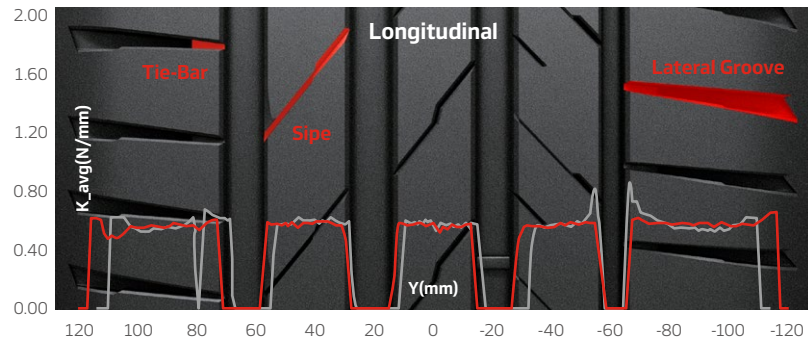

Maximised stiffness in the driving direction, particularly in the outside blocks, enhances grip on dry roads.

Outstanding Outlasting Performance

Optimised Pattern Distributes Stiffness

Sipes, lateral grooves, and tie-bars are balanced to ensure uniform block stiffness. The distributed wear extends mileage by over 30% compared to the previous model.

— **ventus evo**
— Conventional

Uniform Contact Distributes Pressure

Optimised tyre shape and structure ensure balanced contact pressure distribution across the tread, promoting uniform wear and excellent mileage, even under heavy loads.

— **ventus evo**
— Conventional

Mileage Improved **32%**
compared to its predecessor

ventus evo

Conventional

Technology

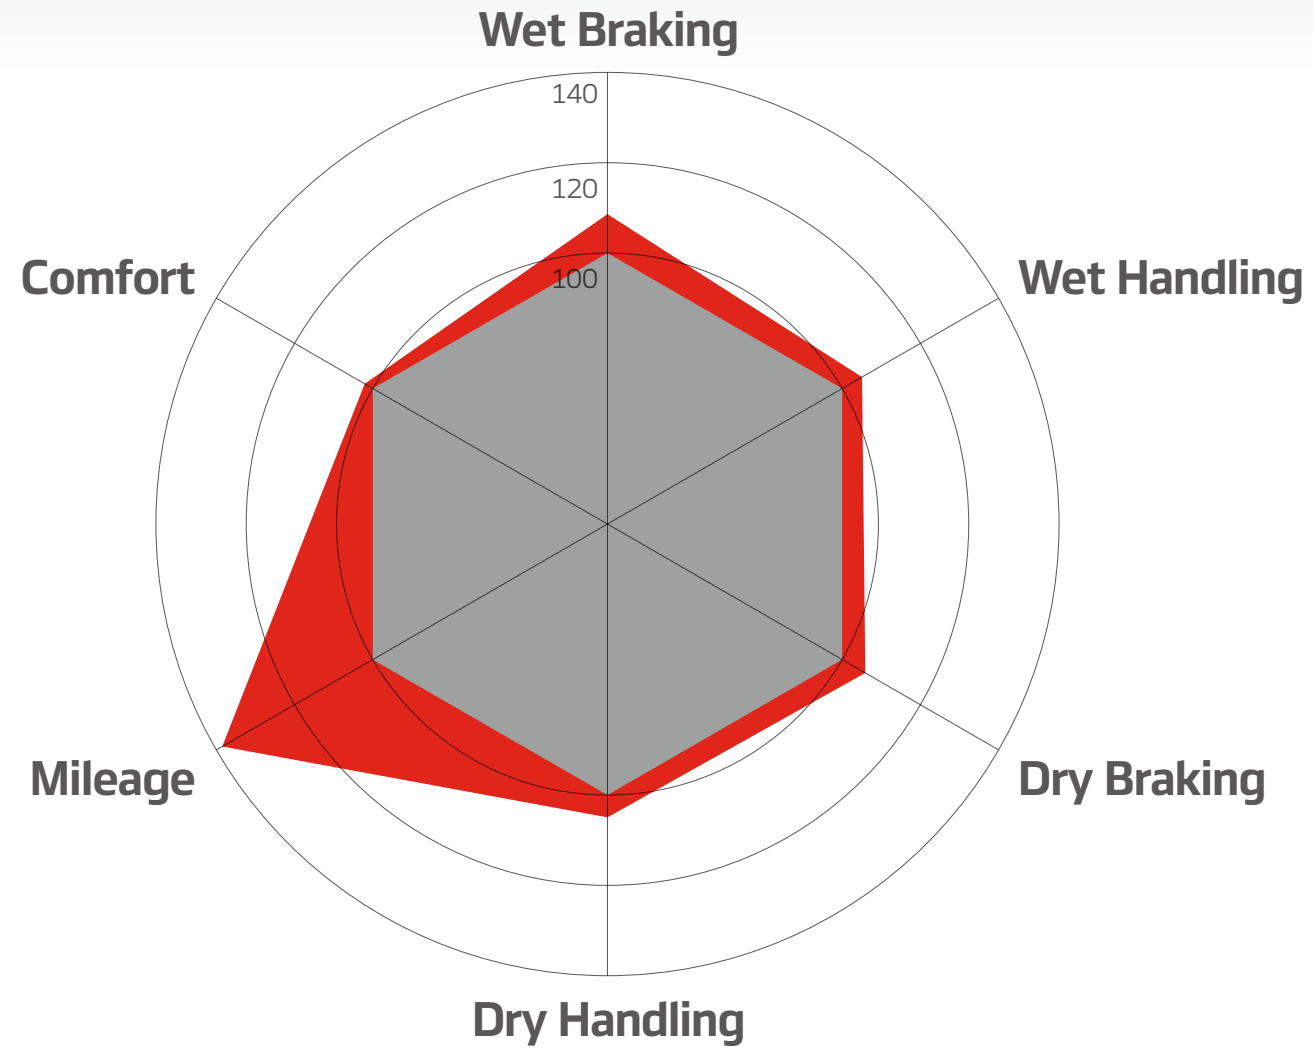

Sidewall Design

PREMIUM SIDEWALL DESIGN

The aerodynamically improved sidewall is styled with Vanta Velvet lasered graphics for enhanced readability, tailored to Ventus evo users.
